SUPPLEMENTS TO THE *SURVEY OF CURRENT BUSINESS*, 1951

National Income . . . *1951 Edition*

A landmark in the field of economic statistics, featuring—

- national income and product statistics, 1929–1950
- a review of economic trends in the past two decades
- the basic principles underlying national accounts
- an explanation of methods and sources
- allowance for inflation: constant vs. current dollars

This base book, containing the only complete and authoritative description of the development of the national accounts, is an indispensable tool to the economist desiring comprehensive and integrated information on the Nation's economic life.

216 pages. Price $1.

Business Statistics . . . *1951 Edition*

A businessmen's handbook presenting more than 2,600 series of business indicators for 15 years—a monthly record of data from January 1947 through December 1950 with annual averages of monthly data from 1935 through 1950.

Business Statistics presents comprehensive descriptions and explanations of all statistical data covered in its tables and in the monthly *Survey of Current Business*, furnishing the reader with information essential to the proper use of the data. Definitions of the statistical units employed, methods by which they are collected, and adequacy of samples are among the items included.

309 pages. Price $1.50.

Regional Trends in the United States Economy

Two decades of sectional economic progress are analyzed in this comprehensive survey of seven major geographic areas, showing their relationship to the national economy. Geographic distribution of industry and population, as well as production, investment and trade, the factors determining the level of per capita income in each region, are highlighted and analyzed to provide a clear picture of State and regional economic progress. 121 pages. Price $1.
